

EARTHING ROLLER (2ROLLER-WEIGHT TYPE)

Model No. : CW54

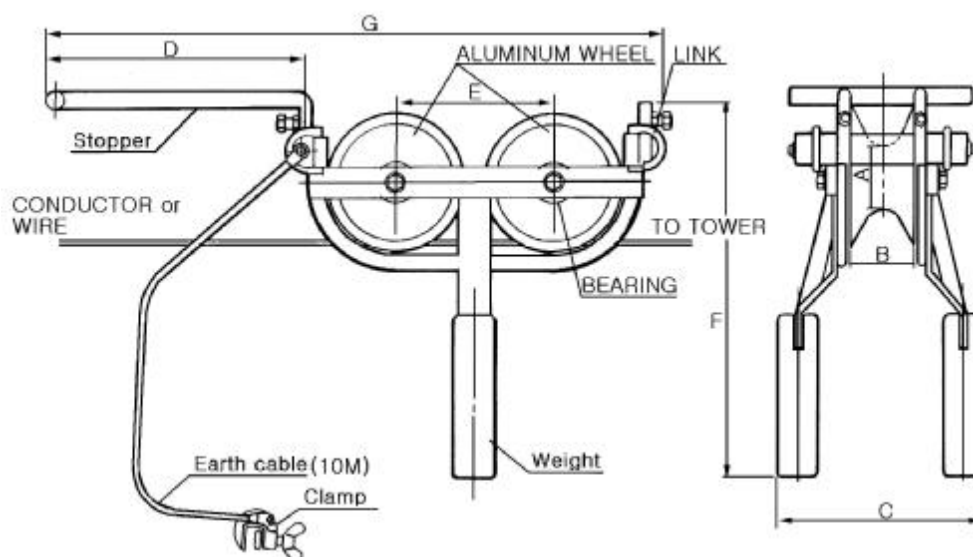

This EARTHING ROLLER is specially designed for protecting workers from electric shock by exist high voltage cable when they are working for overhead conductors or OPGW using with insulated equipment, roller, tensioner etc.

FEATURES

1. It's consist of 2 aluminum wheels, 2 object for weight balance and 1 roll wire to reach ground.
2. The aluminum wheels are quite smoothly rolling by using high quality bearing.
3. This earthing roller is used by setting at front of engine puller or tensioner.
4. To make better connecting with conductor, 2 object for weight balance should be used.
5. The conductor can be passing through between the wheels.

LAY-OUT

SPECIFICATION
